

BG-COM-ANKL.PRINT-12P-SCHNEID

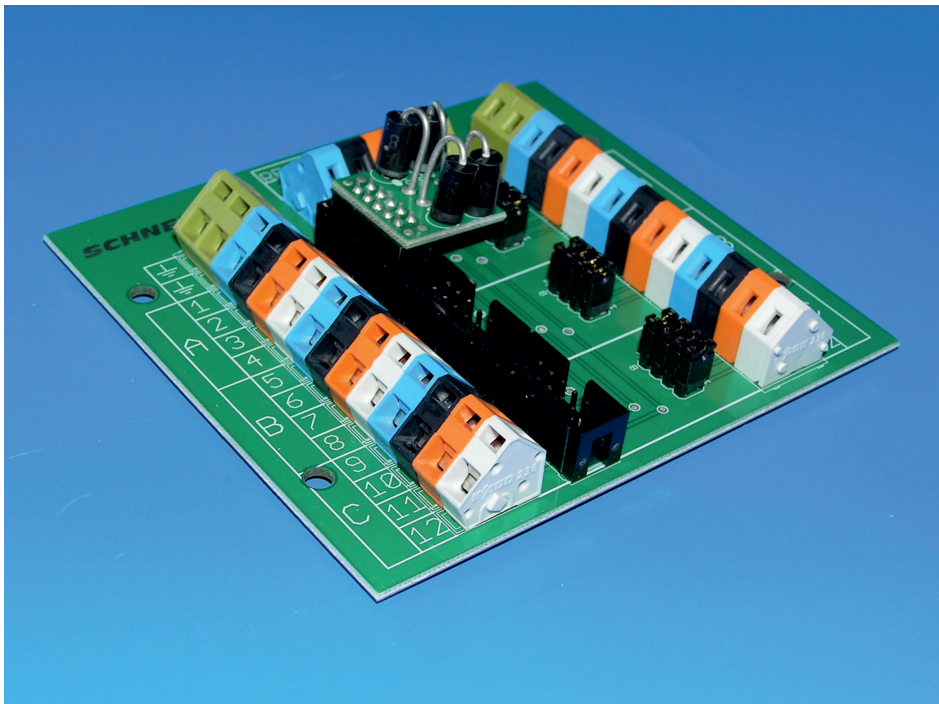

Clamp print 12P for FSS-**SCHNEID** systems with plug-in surge module twelve-pin design

Overview

The clamping print is used for clamping the ground-data cable in accordance with the specifications for **SCHNEID** networks (for further details visit www.schneid.at).

Further, all necessary discharger modules and protective organs are integrated in the print as precaution in order to protect the network and the controller electronics against direct and indirect lightning stroke.

The print is delivered loosen and without casing.
